

## Full Paper Presented for the APCAB2016 Conference

All full papers should be written in English and double-spaced throughout the text, font type Times New Roman. All lines and pages should be consecutively numbered from the start to the end of the paper. Divide your article into clearly defined and numbered sections (1 Introduction, 2 Materials and Methods...). Subsections should be numbered 1.1, 1.2, etc.

Full papers should contain the usual sections:

**TITLE PAGE** contains:

- Title: concise and informative.
- Author(s)
- Affiliation(s)
- Full address for correspondence, including telephone and e-mail

**ABSTRACT**

Abstract should not exceed 250 words at the beginning of the paper and should be followed by 3-5 keywords.

**INTRODUCTION**

State the objectives of the work and give the pertinent background of the study.

**MATERIALS AND METHODS**

Should give essential details to allow the work to be reproduced, including statistical analysis. Methods already published should be indicated by a reference.

**RESULTS**

Present the findings of the research. Results should be clear and concise.

**Tables and Figures**

Note that the maximum number of tables and figures is 8. Please ensure that all figures are clearly labelled and easily readable; figure captions should be placed below the figure. Captions for tables should be placed immediately on top of the table. Both should be numbered consecutively.

**DISCUSSION**

A combined Results and Discussion section is often appropriate. The discussion should explore the significance of the results, not repeat the findings.

**CONCLUSION**

The main conclusion of the study should be presented in a short section. This may include any further research proposed.

**ACKNOWLEDGEMENTS**

Any acknowledgements should be typed as a text and placed before the references.

**REFERENCES**

Please ensure that every reference cited in the text is also present in the references, which should be listed in alphabetical order. Maximum number of references is 30 (see examples below).

**Books**

1. Lobban CS, Harrison PJ (1994) *Seaweed Ecology and Physiology*. Cambridge University Press, Cambridge, UK. 366 pp.

**Journals**

2. Lüning K, Pang S (2003) Mass cultivation of seaweeds: current aspects and approaches. *J Appl Phycol* 15: 115–119.
3. Li J, Xue L, Yan H, Liu H, Lian J (2008) Inducible EGFP expression under the control of the nitrate reductase gene promoter in transgenic *Dunaliella salina*. *J Appl Phycol* 20: 137-146.

Optional: Please submit, with the full paper for the names, addresses and e-mail addresses of three potential referees.
